DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to an apparatus for determining a threshold cycle number, classified in class 204, subclass 193.
 - II. Claims 7-12, drawn to an apparatus for determining a threshold time value, classified in class , subclass .
 - III. Claims 13-22, and 36-49, drawn to an apparatus for determining an unknown quantity of nucleic acids classified in class , subclass .
 - IV. Claims 23-35, drawn to an apparatus for determining any threshold value, classified in class , subclass .
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility such as determining a threshold cycle number in an amplification reaction. See MPEP § 806.05(d).
3. Inventions of groups II and III-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

shown to be separately usable. In the instant case, invention of Group II has separate utility such as determining a threshold time value in an amplification reaction . See MPEP § 806.05(d).

4. Inventions of Groups III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group IV has separate utility such as determining an unknown quantity of nucleic acids. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to William Schmonsees on March 20, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
